### **How to Invest in the Future of Robots & Automation** *The First Actively Managed Mutual Fund Dedicated to Robotics and Automation*

The AlphaCentric Global Innovations Fund (GNXIX) is the FIRST actively managed mutual fund dedicated to Robotics & Automation, often coined the "Next Industrial Revolution." Like biotech in the 1980's, Robotics & Automation has seen great advancement and being deployed in ways you likely hadn't even thought about. But hindsight isn't always 20/20 and GNXIX creates the opportunity to get invested while it is still in its infancy.

### **Integrating the AlphaCentric Global Innovations Fund:**

To further illustrate the potential benefits of alternatives, we highlight an AlphaCentric alternative fund that could be a potentially good fit in your client's alternative allocation: the AlphaCentric Global Innovations Fund (GNXIX).

### **Investment Strategy:**

The AlphaCentric Global Innovations Fund employs proprietary bottom up research to identify companies worldwide with innovation technologies, such as robotics and automation companies, and potential for long-term outperformance. GNXIX seeks to hedge both market

and currency risks.

**Investors should carefully consider the investment objectives, risks, charges and expenses of the AlphaCentric Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 844-ACFUNDS (844-223-8637) or at [www.AlphaCentricFunds.com](http://www.AlphaCentricFunds.com). The prospectus should be read carefully before investing. The AlphaCentric Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. AlphaCentric Advisors LLC is not affiliated with Northern Lights Distributors, LLC.**

Sharpe Ratio: A risk-adjusted measure of a fund's performance that indicates a fund's return per unit of risk, defining risk as volatility (standard deviation).

Investing in the Fund carries certain risks. The Fund will invest a percentage of its assets in derivatives, such as futures and options contracts. The use of such derivatives and the resulting high portfolio turn-over may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives. The Fund may experience losses that exceed those experienced by funds that do not use futures contracts and options strategies. Investing in commodities markets may subject the Fund to greater volatility than investments in traditional securities. Currency trading risks include market risk, credit risk and country risk. Foreign investing involves risks not typically associated with U.S. investments. Changes in interest rates and the liquidity of certain investments could affect the Fund's overall performance. The Fund is non-diversified and as a result, changes in the value of a single security may have significant effect on the Fund's value. Other risks include U.S. Government securities risks and investments in fixed income securities. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. Furthermore, the use of leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the Fund's share price. The Fund is subject to regulatory change and tax risks; changes to current rules could increase costs associated with an investment in the Fund. These factors may affect the value of your investment.
