

## How to Invest in the Future of Robots & Automation

### The First Actively Managed Mutual Fund Dedicated to Robotics and Automation

[AlphaCentric Global Innovation Fund \(GNXAX, GNXCX, GNXIX\)](#)

The AlphaCentric Global Innovations Fund (GNXIX) is the first actively managed mutual fund dedicated to Robotics & Automation, often coined the "Next Industrial Revolution". Like biotech in the 1980's, Robotics & Automation has seen great advancement and being deployed in ways you likely hadn't even thought about. But hindsight isn't always 20/20 and GNXIX creates the opportunity to get invested while it is still in its infancy.

Read about a robotics startup that makes machines that can work at 20 times the pace of humans: ["These Robots Are Using Static Electricity to Make Nikes"](#) - Bloomberg Technology

- [FANUC Industrial Robots at AUDI](#)

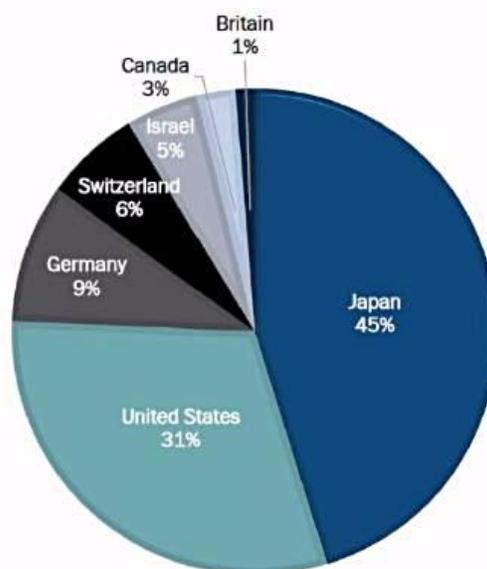

## Targeted Sector and Geographic Allocation

The Fund is diversified by company, industry, sector, country, market capitalization and style and acts as a complement to a diversified equity portfolio.

▪ Sector Allocation

▪ Country Allocation

Sector diversification can change and should not be considered investment advice. The Fund's assets may be invested in the securities of a limited number of companies, which may cause the Fund's portfolio to be susceptible to a single economic event.

## Integrating the AlphaCentric Global Innovations Fund

To further illustrate the potential benefits of alternatives, we highlight an AlphaCentric alternative fund that could be a potentially good fit in your client's alternative allocation: the [AlphaCentric Global Innovations Fund \(GNXIX\)](#).

**Investment Strategy:**

The AlphaCentric Global Innovations Fund employs proprietary bottom up research to identify companies worldwide with innovation technologies, such as robotics and automation companies, and potential for long-term outperformance. GNXIX seeks to hedge both market and currency risks.

AlphaCentric Advisors LLC is not affiliated with Northern Lights Distributors, LLC.**

Investing in the Fund carries certain risks. The Fund may invest a percentage of its assets in derivatives, such as futures and options contracts. The use of such derivatives and the resulting high portfolio turn-over may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives. The Fund may experience losses that exceed those experienced by funds that do not use futures contracts and options strategies. To the extent the Fund invests in the stocks of smaller-sized companies, the Fund may be subject to additional risks, including the risk that earnings and prospects of these companies are more volatile than larger companies. Smaller-sized companies may experience higher failure rates than larger companies and normally have lower trading volume than larger companies. These factors may affect the value of your investment. The Fund is non-diversified and as a result, changes in the value of a single security may have significant effect on the Fund's value. The Fund is subject to regulatory change and tax risks; changes to current rules could increase costs associated with an investment in the Fund. These factors may affect the value of your investment. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxations and differences in auditing and other financial standards. Risks of foreign investing are generally intensified for investment in emerging markets. Emerging market securities tend to be more volatile and less liquid than securities traded in developed countries.
