

**BDRAX** | **BDRCX** | **BDRIX**

## FUND OBJECTIVE

To achieve long-term total return through various economic and interest rate environments by implementing a disciplined, rules-based process.

## INVESTMENT STRATEGY

The Fund invests in a portfolio of global bond asset class ETFs, including those that invest in U.S. corporate bonds (including investment grade, high yield, floating rate and convertible bonds), foreign bonds (including emerging markets sovereign debt and international treasury), U.S. tax-free/municipal bonds (national, intermediate, high yield and Build America), mortgage-backed securities and U.S. Treasury securities.

- ETFs are ranked each month according to a relative strength score using two different proprietary formulas that take into account price movement and volatility.
- The top ranked ETFs are purchased and held until they fall out of ranking. They are then replaced with the new top-ranked ETFs.
- The Portfolio will generally include between 2 and 4 bond ETFs, depending on the results of each proprietary selection formula.

## HOW TO INVEST

Share Class	Ticker	CUSIP
Class A	BDRAX	62827M136
Class C	BDRCX	62827M128
Class I	BDRIX	62827M110

Min. Initial Investment: \$2,500  
 Min. Subsequent Investment: \$100

The **AlphaCentric Bond Rotation Fund** seeks to generate superior risk-adjusted total return through various economic and interest rate environments by tactically investing in the global bond asset class ETFs experiencing the most strength.

### ✓ Tactical & Flexible Approach

The Fund seeks to allocate to the global bond asset class exchange traded funds (ETFs) experiencing the most strength each month. The goal is to generate superior risk-adjusted returns in any economic and interest rate environment.

### ✓ Seeks Downside Protection

If the proprietary screens used to rank the strength of each bond asset class demonstrate weakness in higher risk bonds, the Fund may invest only in U.S. Treasury Bond ETFs and/or cash, potentially limiting drawdowns.

### ✓ Disciplined Strategy

We use a proprietary, rules-based approach to select the global bond asset class ETFs demonstrating the most strength.

## GROWTH OF \$10,000

## PERFORMANCE ENDING MARCH 31, 2017 (Annualized if greater than 1 year)

## RISK CONSIDERATIONS:

4275-NLD-4/6/2017

Investors should carefully consider the investment objectives, risks, charges and expenses of the AlphaCentric Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 844-ACFUNDS (844-223-8637) or at [www.AlphaCentricFunds.com](http://www.AlphaCentricFunds.com). The prospectus should be read carefully before investing. The AlphaCentric Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. AlphaCentric Advisors LLC is not affiliated with Northern Lights Distributors, LLC.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund is non-diversified and may invest a greater percentage of its assets in a particular issue and may own fewer securities than other mutual funds. The performance of the Fund may be subject to substantial short term changes. Because the Fund may invest in other investment companies such as ETFs, the value of your investment will fluctuate in response to the performance of the acquired funds. Investing in acquired funds involves certain additional expenses and certain tax results that would not arise if you invested directly in the securities of the acquired funds. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. Foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies. Investing in emerging markets involves additional risks, including exposure to economic structures that are generally less diverse and mature, and to political systems that can be expected to have less stability than those of developed countries. The value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. When the Fund invests in mortgage-backed securities, the Fund is subject to the risk that, if the underlying borrowers fail to pay interest or repay principal, the assets backing these securities may not be sufficient to support payments on the securities. These factors may affect the value of your investment.
