FUND OBJECTIVE

To achieve current income by implementing an alpha-driven, "principles-based" investment process focusing on complex and hard to source asset-backed investments.

INVESTMENT STRATEGY

The Fund will primarily focus its investments in non-agency residential mortgage backed securities (RMBS) and a variety of asset-backed fixed income securities (ABS). These ABS will encompass aircraft, shipping, and transportation assets, and may include many other sectors as well. The Fund's allocations in these various asset classes depends on the management team's assessment of the risk-adjusted return potential in the marketplace at a given time. Securities in the Fund will generally have an average duration of less than five years.

The **AlphaCentric Income Opportunities Fund** seeks to generate current yield and total return via investments in often overlooked segments of RMBS, ABS and securitized markets.

✓ Non-Agency RMBS Focus

The Fund focuses on non-agency residential mortgage-backed securities (RMBS), although the Fund can invest where management finds value. The management team's clearly-defined, niche focus is the core of the RMBS strategy's success.

✓ Strong Track Record¹

The Sub-Advisor has managed a substantially similar strategy that has consistently met its objective of current income while outperforming its benchmark.

Barclays US Aggregate Bond Index: A market capitalization-weighted index that is designed to measure the performance of the U.S. investment grade bond market with maturities of more than one year.

Morningstar Multisector Bond Category: Used for funds that seek income by diversifying their assets among several fixed-income sectors, usually U.S. government obligations, foreign bonds, and high-yield domestic debt securities. **Effective Duration:** Provides a measure of a fund's interest rate sensitivity; the higher the value of a fund's duration, the more sensitive the fund is to shifts in interest rates.

There is no assurance that the Fund will achieve its investment objective. You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund is non-diversified and may invest a greater percentage of its assets in a particular issue and may own fewer securities than other mutual funds; the Fund is subject to concentration risk. Credit risk is the risk that the issuer of a security will not be able to make principal and interest payments when due. The use of derivatives and futures involves risks different from, or possibly greater than, the risk associated with investing directly in securities. Fixed income securities will fluctuate with changes in interest rates. Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality. The performance of the Fund may be subject to substantial short term changes. There are risks associated with the sale and purchase of call and put options. These factors may affect the value of your investment.
