

Shown here are the ten most recent full years of annual returns of some commonly used asset classes. **The AlphaCentric Strategic Income Fund (SIIX)** takes advantages of inefficiencies in real estate-related fixed income and equity securities. This flexibility helped the Fund deliver ten years of performance with no negative years. **In fact, SIIX is the only non-cash asset class in this group without a negative year.**

Russell 2000® Index consists of the smallest 2,000 companies in a group of 3,000 U.S. companies in the Russell 3000 Index, as ranked by market capitalization.

S&P 500 Total Return Index is a widely recognized, unmanaged index of the approximately 500 largest companies in the United States as measured by market capitalization and is considered to be generally representative of the US large capitalization stock market as a whole.

IMPORTANT RISK INFORMATION

Performance shown before May 28, 2021 is for the Fund's Predecessor Fund (Strategos Deep Value Fund LP). The prior performance is net of management fees and other expenses including the effect of the performance fee. The Predecessor Fund had an investment objective and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. From its inception to May 28, 2021, the Predecessor Fund was not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act or the Code, which if they had been applicable, might have adversely affected its performance. In addition, the Predecessor Fund was not subject to sales loads that would have adversely affected performance. Performance of the Predecessor Fund is not an indicator of future results.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. The Fund is non-diversified and may invest a greater percentage of its assets in a particular issue and may own fewer securities than other mutual funds; the Fund is subject to concentration risk. Credit risk is the risk that the issuer of a security will not be able to make principal and interest payments when due. The use of derivatives and futures involves risks different from, or possibly greater than, the risk associated with investing directly in securities.

Fixed income securities will fluctuate with changes in interest rates. Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality. The performance of the Fund may be subject to substantial short-term changes. There are risks associated with the sale and purchase of call and put options.

The Fund is subject to foreign securities risk and industry concentration risk. The Fund's investments may be concentrated in an industry or group of industries that are more vulnerable to adverse market, economic, regulatory, political or other developments affecting the industry or group of industries than a fund that invests its assets more broadly. These factors may affect the value of your investment.

Investors should carefully consider the investment objectives, risks, charges and expenses of the AlphaCentric Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 844-ACFUNDS (844-223-8637) or at www.AlphaCentricFunds.com. The prospectus should be read carefully before investing. The AlphaCentric Funds are distributed by Northern Lights Distributors, LLC, member FINRA.
